

Figure 10 displays the longitudinal profile of the road, showing the existing ground (Rzędne istn.) and the proposed road grade (Odległości istn.) across five segments. The segments are defined by the vertical curve points (P.P.) and their corresponding elevations:

- Segment 1:** P.P. 307.00. The profile shows a slight dip followed by a rise. Key elevation points on the proposed grade are 307.90 and 307.90.
- Segment 2:** P.P. 305.00. The profile shows a slight dip followed by a rise. Key elevation points on the proposed grade are 305.94 and 305.94.
- Segment 3:** P.P. 303.00. The profile shows a slight dip followed by a rise. Key elevation points on the proposed grade are 303.31 and 303.31.
- Segment 4:** P.P. 301.00. The profile shows a slight dip followed by a rise. Key elevation points on the proposed grade are 301.31 and 301.31.
- Segment 5:** P.P. 299.00. The profile shows a slight dip followed by a rise. Key elevation points on the proposed grade are 299.29 and 299.29.

The existing ground (Rzędne istn.) is shown as a solid line, and the proposed road grade (Odległości istn.) is shown as a dashed line. The vertical axis represents elevation in meters (m), and the horizontal axis represents stationing in kilometers (km).

Figure 1 displays 12 cross-sections (P42z-1 to P42z-12) showing the profile of the road and the ground level. Each cross-section includes a vertical axis for elevation (m) and a horizontal axis for distance (km). The road profile is shown in red, and the ground level is shown in green. The cross-sections are labeled with their respective elevation and distance values.

P42z-12	312.00	0+550.00

The figure displays 12 cross-section diagrams, each representing a different stationing point (P452-1 to P452-13). Each diagram shows the vertical alignment of a track, with the red line indicating the proposed track profile and the green line showing the existing ground level. The vertical axis represents elevation in meters (m), and the horizontal axis represents distance in kilometers (km). A vertical dashed line marks the centerline of the track. Below each diagram is a table with two columns: 'Rzędne istn.' (Existing elevations) and 'Odległości istn.' (Existing distances). The tables contain numerical data for each point along the profile.
